

Imposition Publisher QP™

*Electronic imposition
for Digital Printers*

MAIN FEATURES

Imposition Publisher QP™ is the fast, efficient and easy to use electronic imposition solution specifically designed for the Quick Print Digital Printing environment. Designed by DTP users for DTP users, with an intuitive user interface, Imposition Publisher QP uses unique application drivers to automatically extract page size, embedded font information and other data from PostScript files. This reduces the number of steps when imposing a job, making it far simpler to use.

IMPOSITION

- Handles all perfect bound, saddle stitched, step & repeat and incremental imposition schemes
- Can process up to 1024 PostScript pages in a single imposition
- Also supports PDF files
- Drag and drop page re-ordering
- Allows insertion of blank pages
- Impositions are independent of page size so fewer impositions are needed
- Automatic page numbering
- Handles bleed automatically
- Can set trims individually
- Able to creep and bottle pages
- Supports double page spreads

UNIQUE DRIVER SYSTEM

- Extracts more information from PostScript files, so less user input is required
- Smaller output files for higher productivity

PRINTER SETUP AND PRINTING OPTIONS

- Custom imposition alignment and offsets
- Save multiple printer set-ups for different output devices
- Can add a job name to the imposition
- Supports duplex printers
- Automatic scaling to fit a proofing device
- Supports mirroring, negative output or both
- Output to any PostScript device or PDF up to 18" by 13" in size

OPTIMISATION

- Will optimise files to the Digital Printer to achieve the most economical material usage
- Automatic adjustment of crop mark length

PRINT MARKS

- Comes with an extensive suite of standard print marks, including crop marks, colour bars etc.
- Able to change positions of standard marks
- Can add an extensive user label anywhere on the output
- Print marks can be saved in different sets to allow users to easily switch between set-ups

AUTOMATIC FONT & COLOUR HANDLING

- Unique font handling avoids the need to have customer fonts on your system
- Processes composite and separated files
- Extracts colour order and information automatically from PostScript
- Colour separates colour bars and marks automatically
- Displays the colour of each separation
- Can select which colour separations to print

OTHER MAJOR BENEFITS

- PDF Preview feature allows impositions to be checked on screen before output
- Works with all major OPI servers
- Will support all standard units of measurement
- Handles nested EPS files
- Supports one output file per block
- Can edit existing impositions

SYSTEM SPECIFICATION

Mac OS

- Power Macintosh:
 - System 8.1 or higher;
 - At least 32 Mbyte free RAM;
- Sufficient Hard Disk space is required to hold input PostScript files and for temporary scratch space.
